ATTENTION DANGER

Le niveau d'eau dans la rivière est très élevé.
Le pont en bois à droite n'est pas sécurisé.
La circulation sur le pont est donc interdite.
Les personnes qui se promènent ou qui traversent la rivière doivent faire très attention.
Ne pas se baigner dans la rivière.

Peru

OBI

A vertical ruler-like scale is positioned on the left side of the image, showing measurements from 24 to 39. The water level in the flooded area reaches approximately 34.5 on this scale.

A vertical water level gauge scale stands upright in a body of water, likely a river or lake, during a flood. The scale is marked with numbers from 11 to 29 in increments of 1. The water level is approximately at the 14 mark. The background shows the turbulent, brownish water of the flood, with other wooden poles partially submerged in the distance.
